Keep Recorder Joints Lubricated!

Susato™ Renaissance Recorders are designed with a bigger bore of near cylindrical bore geometry allowing the generation of considerably richer sound in the lower register. Most recorders currently in production are based on Baroque style recorders which "shine" in the upper register, but have a very weak lower register. The Susato™ Renaissance Style Recorders are therefore particularly suitable for music where a strong lower register is needed: as is the case with Renaissance and Folk music.

Susato™ Brand Pennywhistles, Tabor-Pipes, Pentatonic Recorders, Renaissance Style Recorders and Ocarinas are manufactured and distributed world-wide by Kelhorn Corporation / Kelschek Workshop for Historical Instruments, 199 Waldroup Road, Brasstown NC 28902 USA.
